Installation instruction

- Allow the underfloor, like the top floor to be installed, to acclimate in the closed packaging for at least 24 hours in the room where it will be installed.
- The ideal humidity for installation is between 50–70% and the working temperature is 15–20 degrees Celsius.
- Work cleanly and ensure that the substrate is completely free of debris, dust-free, and dry before installation.
- For cutting the underfloor, we recommend a standard trapezium break-off knife.
- An underfloor cannot prevent the movement of a floor.
- We advise always following the installation advice of the floor supplier.

Top side

Soundstop 2 mm: 15 x 1 m (15 m²)

Art. nr - 68831

N/A (except for item 68832 Soundstop Plus 2 mm – Floating installation with the moisture barrier facing upwards. Tape the seams).
