Installation instruction

- Allow the underfloor, like the top floor to be installed, to acclimate in the closed packaging for at least 24 hours in the room where it will be installed.
- The ideal humidity for installation is between 50–70% and the working temperature is 15–20 degrees Celsius.
- Work cleanly and ensure that the substrate is completely free of debris, dust-free, and dry before installation.
- For cutting the underfloor, we recommend a standard trapezium break-off knife.
- An underfloor cannot prevent the movement of a floor.
- We advise always following the installation advice of the floor supplier.
