Description

The Roberts electric mixer 230V has been developed for professional use during flooring and preparation work. Its high-torque motor ensures efficient mixing, while the variable speed control provides enhanced handling for various materials.

Featuring a safety switch with lock-on function for uninterrupted operation, and equipped with thermal overload protection for added safety during heavy-duty applications.

- 230V model
- Powerful high-torque motor for efficient mixing
- Variable speed for greater control
- Ergonomic handle for comfortable use

Roberts Electric mixer 1600W 230V

Art. nr - R10120

- Safety switch with lock-on function
- Thermal overload protection
- Supplied with Ø140mm mixing paddle
- Includes carry case for storage and transport

Please note: The R1012C requires 2× QEPBA4 4.0Ah batteries and 1× QEPCH1 charger. Alternatively, order RMSPECIAL for the complete kit. An appropriate UK-to-EU plug adapter is required for the charger when used in the EU.
