Description

The Roberts Seam / Restretcher is designed for stretching carpet in tight spaces and areas where the Powerlok Stretcher cannot be braced against an opposite wall.

Its compact design makes the seam and restretcher versatile. With the special scoop-shaped attachment, you can repair carpet seams and stretch the carpet precisely. Ideal for correcting misalignment, pattern distortion, and gaping seams.

- Accurate pattern alignment: the stretcher head locks after a 6 mm movement of the pin plate.
- Double stretcher head: suitable for correcting misalignment, curvature, shifted carpet patterns, and closing gaping seams.
- Adjustable pin depth: easily adaptable to different carpet thicknesses.

Roberts Seam / Restretcher

Art. nr - R10128

- Sturdy cast frame: withstands a pulling force of up to approximately 136 kg.
- Storage case: includes a specially shaped case for safe storage and transport.
- Extra support sheet: for stretching carpet from the gripper rod.
