Description

Roberts spacers are specifically designed for installing wood and laminate flooring. They ensure a consistent distance is kept between the floor and the wall, for a tidy and professional result.

The wedge-shaped spacers are easy to position and remove, while the ribbed surface helps prevent slipping during installation. These robust spacers are reusable and suitable for multiple projects.

- Ideal for wood and laminate floors
- Keeps a uniform expansion gap along the wall
- Suitable for glued or floating floors
- Wedge design makes placement and removal simple

Roberts Laminate wedge expansion spacers
