Description

Roberts 4-in-1 spacers are designed for installing vinyl, laminate, and engineered wood. They assist in maintaining the correct distance along walls and thresholds during installation, allowing the floor space to expand.

The self-supporting design ensures the spacers stay in place during installation. They are reusable, making them practical for multiple installation projects.

- For vinyl, laminate, and engineered wood
- Suitable for use along walls and thresholds
- Helps maintain a consistent expansion gap
- Self-supporting design, stays in place during installation
- Reusable
- Packed per 30 pieces
