Description

The Roberts Double Faced Hammer is engineered for professional flooring installation and is used in conjunction with a tapping block or pull bar. It enables precise positioning of floorboards without visible damage to the material.

The double-faced head delivers reliable striking force, while the plastic handle with rubber grip ensures comfort during extended use. This hammer is suitable for use with the Roberts Double Tap Reversible Tapping Block and the Roberts Maverick Pull Bar.

- Non-marking double faced design
- For use with a tapping block or pull bar
- Helps position floorboards with control
- Durable plastic handle
- Rubber grip for comfortable handling
- Suitable for professional flooring installation
