Description

The Roberts cross line laser is designed for professional applications where accurate alignment is essential. The laser offers 2, 3 or 5 lines, making it easy to quickly and accurately mark out horizontal and vertical reference lines.

The automatic self-levelling function ensures precise operation, while the out-of-level warning helps prevent errors during alignment. The 360° rotatable base with fine adjustment allows you to position the laser precisely as needed. The supplied carrying case makes storage and transport convenient.

- Self-levelling cross line laser for professional use
- 2, 3 or 5 laser lines for different alignment tasks

Roberts Laser level

Art. nr - R10635
