Description

The Roberts spiked roller 500 mm has been developed for professional subfloor preparation. It helps eliminate air bubbles from levelling compounds, ensuring a more even finish.

Thanks to its wide design, this roller is especially suitable for larger spaces. The heavy-duty steel frame can be used with standard push-fit extension and broom handles, enabling efficient work on large floor areas.

- Removes air bubbles from levelling compounds
- Ideal for subfloor preparation
- Suitable for larger areas
- Heavy-duty steel frame
