Description

The Roberts spiked roller 250 mm has been purpose-built for professional subfloor preparation. It efficiently removes air bubbles from levelling compounds, ensuring a smoother and more even finish.

Its compact width makes this spiked roller practical for use in smaller areas and corners. The durable steel frame is compatible with all standard push-fit extension poles and broom handles, offering maximum flexibility during installation.

- Removes air bubbles from levelling compounds
- Ideal for subfloor preparation
- Perfect for smaller spaces and corners
