Description

The Roberts stair tool has been developed for professional carpet installation. This tool is used to press carpet securely into the gripper rods, tuck it into slots, and fold it snugly along the wall line for a neat finish.

Crafted from forged, chrome-plated steel, the stair tool ensures long-lasting strength and durability. The 100 mm wide blade allows for controlled and precise pressing and finishing of carpet.

- For pressing and finishing carpet
- Suitable for use along gripper rods
- For tucking carpet into slots
