

Best Base Green

An underlay with a story

The next step in
sustainability

Best Base Green, an underlay with a story

From mattress to carpet underlay

Best Base Green shows that an underlay can carry a story too. Best Base Green is made from post-consumer recycled material, sourced from used mattresses.

With this, we are taking the next step in sustainability. While recycled material often comes from clean production waste, post-consumer goes further. It brings material back from the waste stream of used products and gives it a fully functional new application. That is where the environmental benefit lies: less loss of usable raw materials, less waste in the chain, and a more conscious use of existing material.

For Estillon, this is about more than a different material choice. We take responsibility for making more sustainable choices and continue to work on the further development of our products. Best Base Green makes that step tangible.

From mattress to underlay

The circular economy as the foundation for a new underlay

Post-industrial vs post-consumer

The difference lies in where the material comes from

Post-industrial	Post-consumer
Material from production waste	Material from used products
Production residual streams	Existing waste streams
Comes from the production process	Comes from the use phase
Reuse of factory surplus material	Reuse of material after use
First step in recycling	Next step in sustainability

Performance

More sustainable in origin, strong in performance

More comfort, more stability, and a floor that stays beautiful for longer: that is exactly what you should expect from a good underlay. Best Base has been a trusted name in carpet underlay for 25 years. With Best Base Green, that foundation remains the same: high quality, reliable performance, and installation confidence.

Best Base Green has been developed to make carpet perform demonstrably better. From residential interiors to retail and intensive contract environments, the application may differ, but the expectation remains the same. That is why the underlay should always be matched to the level of use, the subfloor, and the type of carpet.

Demonstrably better floor performance

- Comfort, enhances the luxurious and comfortable feel of carpet
- Stability, supports a secure and durable floor build-up
- Sound, improves acoustics and helps reduce footfall noise
- Thermal insulation, contributes to additional thermal comfort
- Recovery, excellent recovery after compression
- Service life, helps extend the lifespan of the floor covering

Tested and substantiated, so you can choose a solution that fits the application and continues to perform.

Starbase Green FR 4 mm 718201 / 6 mm 718211 / 8 mm 718221 / 10 mm 718231

estillon
green choice

Description: Starbase Green FR is a high-quality carpet underlay made from post-consumer recycled polyurethane foam. This line forms the comfortable base within the range: stable, durable and suitable for a wide range of both domestic and contract applications. Starbase Green FR ensures a reliable installation and contributes to comfort, support and a pleasant feel underfoot. The line is available in 4, 6, 8 and 10 mm, with a density of 160 kg/m³ and fire classification Bfl-S1.

Floor type: Carpet

- Comfortable base for broad contract use
- Stable and durable installation
- Suitable for domestic and contract use
- Made from post-consumer recycled PU foam
- Available in 4, 6, 8 and 10 mm
- Fire classification Bfl-S1

Elegance Green FR 4 mm 716751 / 6 mm 716761 / 7 mm 717021

estillon
green choice

Description: Elegance Green FR is a premium carpet underlay made from post-consumer recycled polyurethane foam. Thanks to its higher density, this line offers greater support, a firmer and richer feel underfoot, and extra comfort. This makes Elegance Green FR the more luxurious and heavier quality within the range, suitable for domestic and contract use where comfort and load-bearing performance are more important. The line is available in 4, 6 and 7 mm, with a density of 170 to 220 kg/m³ and fire classification Bfl-S1.

Floor type: Carpet

- Premium quality with higher density
- Greater support and a fuller feel underfoot
- Extra luxury and comfort under heavier loads
- Suitable for domestic and contract use
- Made from post-consumer recycled PU foam
- Available in 4, 6 and 7 mm
- Fire classification Bfl-S1

Art.nr	Description	Dimensions	Weight gr/m ²	Thickness mm	Density kg/m ³	Fire classification	Sound reducing ΔLw dB
718201	Starbase Green FR 4 mm	10 x 1,50 m = 15 m ²	640	4	160	Bfl-S1	46
718211	Starbase Green FR 6 mm	10 x 1,50 m = 15 m ²	960	6	160	Bfl-S1	45
718221	Starbase Green FR 8 mm	10 x 1,50 m = 15 m ²	1280	8	160	Bfl-S1	48

Green Choice brings together products that show how sustainability and performance can go hand in hand. Best Base Green is part of this label. With post-consumer recycled material as its foundation, Best Base Green shows how used materials can be given a new life as a high-quality raw material. In this way, Green Choice stands for solutions that are developed more consciously and are relevant for the floor of tomorrow.

Best Base Green

An underlay with a story

Best Base Green has been developed for professionals who look beyond the basics. With post-consumer recycled material as its starting point and performance suited to intensive daily use, this underlay offers a solution that is credible in both origin and application.

- **Made from post-consumer recycled material**

Gives used materials a new life as a high-quality raw material.

- **The next step in sustainability**

Goes beyond the reuse of production residual streams by bringing material back from existing waste streams.

- **Performance without compromise**

Developed for comfort, stability, and a floor build-up that continues to perform over time.

- **Reliable in application**

Suitable for a wide range of situations, from residential interiors to intensive contract environments.
